**WORK EXPERIENCE:**

**Web Developer, Bluehouse Group, Richmond, VT** November 2006 – Present

Develop custom applications in both in-house and third-party PHP frameworks. Build database models, controllers and templates for a wide variety of website projects using an open source content management system. Set up DNS and virtual hosts on a dedicated LAMP server hosting hundreds of web sites. Write server-side scripts to generate dynamic content on standards-compliant web pages. Create CSS framework for large-scale projects. Provide technical support and regular updates to legacy clients. Work with graphic designer to create and edit graphics for look-and-feel of web sites. Work with project managers to coordinate project scheduling and scope. Meet with clients to discuss and analyze concepts for new web sites. Generate estimates for prospective jobs. Write comprehensive documentation for homegrown web applications and external solutions adopted by the company.

**Web Developer, Union Street Media, Burlington, VT** May 2006 – November, 2006

Built standards-compliant web pages based on mockups from graphic designers. Integrated custom coded XHTML templates to work with a proprietary content management system. Worked directly with clients in technical support and requests for updates to web sites. Developed solutions for that extended beyond the capabilities of the CMS.

**Freelance Web Developer, Burlington, VT** September 2004 – Present

Managing relationships with a variety of clients. Project planning and consulting. Business development. Time tracking and invoicing. Designing website layouts and templates. Optimize clients' web sites for high ranking in search engines to increase traffic.
